PROFESSIONAL SUMMARY

Information Systems graduate (GPA 3.60/4.00, Universitas Gunadarma) with hands-on experience designing and delivering enterprise-grade web applications. Currently completing a Human Capital internship at BNI Finance, where I architected a full HCMS E-Learning platform from requirements analysis through to cloud deployment. Proficient across the full stack—Next.js 14, TypeScript, Laravel, Prisma, PostgreSQL—with practical exposure to Docker, Azure Kubernetes Service, and Microsoft SSO. Equally comfortable translating business requirements into system specifications and writing the code that implements them.

WORK EXPERIENCE

Human Capital Intern — System Developer

December 2024 – June 2026

PT BNI Multifinance (BNI Finance) · Rasuna Said, Jakarta

- Architected and built an HCMS E-Learning platform from scratch — covering employee training enrollment, multi-level exam proctoring, real-time analytics dashboard, and role-based access control (Super Admin, HRD, Manager, Karyawan).
- Tech stack: Next.js 14 App Router + TypeScript + Prisma ORM + PostgreSQL, containerized with Docker and planned for Azure Kubernetes Service (AKS) via Jenkins CI/CD pipeline.
- Implemented Microsoft Entra ID Single Sign-On with single-tenant enforcement and domain-level user validation.
- Designed automated scheduler system with 5 cron job types: auto-fail expired exams, proactive deadline reminders, weekly leaderboard snapshots, and enrollment approval workflows.
- Built multi-sheet Excel export reports using ExcelJS with BNI Finance corporate branding for user competency analysis.
- Developed a Python/Streamlit Payslip Generator that processes Excel/CSV payroll data into password-encrypted PDF payslips with mass email distribution via Office 365 SMTP, cutting manual processing time significantly.

NFT Developer Intern — Web3 / Kampus Merdeka

February 2024 – June 2024

MySkill (Kampus Merdeka MSIB Program) · Remote

- Conducted R&D on Non-Fungible Token (NFT) standards and blockchain integration patterns for an aquaculture-domain educational platform.
- Developed interactive frontend features and contributed to blockchain integration using Web3 libraries.

Event Crew — Logistics & Operations

June 2024 – July 2024

Provalliant · Jakarta

- Managed end-to-end logistics for 3 large-scale public events (1,000+ attendees) at Dufan, AEON Mall Deltamas, and Mall of Indonesia.

EDUCATION

Bachelor of Information Systems

2021 – September 2025

Universitas Gunadarma · GPA: 3.60 / 4.00

- Relevant coursework: Database Systems, Software Engineering, Systems Analysis & Design, Computer Networks, Data Mining.

High School Diploma — Social Sciences

2019 – 2021

SMA Mutiara 17 Agustus

TECHNICAL SKILLS

Languages

JavaScript, TypeScript, PHP, Python, SQL, HTML5, CSS3, Ruby

Frameworks

Next.js 14, React, Laravel, Node.js / Express.js, Inertia.js, Ruby on Rails, Tailwind CSS

Database

PostgreSQL, MySQL – with Prisma ORM & raw query optimization

DevOps & Cloud

Docker, Docker Compose, Azure Kubernetes Service (AKS), Jenkins CI/CD, Railway

Auth & Security

Auth.js (NextAuth), Microsoft Entra ID (SSO), Laravel Sanctum, RBAC

AI / Vision

OpenCV, YOLO, Face & Emotion Detection (Python), AI chatbot integration

Tools

Git, GitHub, Postman, VS Code, Prisma Studio, Vite, Figma

Design

Blender (3D Modeling), Adobe Illustrator

KEY PROJECTS

Kelasku1 — Computer-Based Test (CBT) Platform

2024

- Full-stack CBT platform with student dashboard, real-time exam engine, automatic scoring, and email results dispatch (Mailtrap API).
- Stack: Next.js + TypeScript + Tailwind CSS (frontend), Laravel + MySQL (backend), Laravel Sanctum JWT auth. Deployed on Railway.

Rental HS — AI-Powered Car Rental Application

2024

- Rental platform with AI-driven personalized vehicle recommendations and smart filtering.
- Stack: TypeScript, React 19, Vite. Integrated AI assistant for booking guidance and dynamic pricing suggestions.

Multi-Feature Computer Vision Desktop App

2024

- Python desktop application (CLI + GUI) with real-time webcam modules: Face, Motion, Emotion, Mask, Pose, Hand Gesture, Age & Gender Detection, and YOLO Object Detection.

SYStream — Netflix-Style Streaming App

2023

- React 18 + TypeScript + Vite streaming app integrated with TMDB API. Custom video player with progress tracking and responsive design (Tailwind CSS + Bootstrap). Deployed on GitHub Pages.

Barcode Employee Attendance System

2023

- Ruby on Rails web app generating unique employee barcodes with automated clock-in/clock-out detection and timestamp logging.

Point of Sale (POS) System

2023

- Laravel-based POS covering sales processing, inventory management, employee attendance, and comprehensive business reports (sales, top products, staff performance).

CERTIFICATIONS & TRAINING

- **NFT Development in Web3 Era** — MySkill / Kampus Merdeka MSIB (2024)
- **Creating Business Intelligence** — Gunadarma (2025, in progress)
- **Data Preparation for Business Processes** — Gunadarma (September 2024)
- **Java for Intermediate** — LEPKom Gunadarma (August 2024)
- **WAN Using Cisco Router (Intermediate)** — LEPKom Gunadarma (February 2024)
- **Java Programming for Beginner** — LEPKom Gunadarma (August 2023)
- **LAN Using Cisco Router** — LEPKom Gunadarma (February 2023)
- **Intro to Generative AI** — Codecademy (2024)
- **KPPS Committee Member** — Indonesian Presidential Election (February 2024)

ORGANIZATIONAL EXPERIENCE

Active Member — Karang Taruna

June 2024 – Present

Youth social organization — community service, event coordination, and social initiatives.
